

MARCO ARELIANO SUTEJA

+1 604-802-8120 | smarcoareliano@gmail.com | linkedin.com/in/marcosuteja | github.com/Bandoozle

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, Java, HTML, CSS

Frontend: React, Next.js, Vite, Tailwind CSS, Responsive UI, Component Design, Figma Implementation

Backend & APIs: Node.js, FastAPI, REST APIs, JSON, API Integration, Server-Side Development

Databases: PostgreSQL, Supabase, SQL Server, Firebase, Firestore, Convex, MySQL Fundamentals

AI & Automation: Gemini API, Prompt Engineering, LLM API Workflows, AI-Assisted Development, Cursor

Product Engineering: RBAC, Auth Flows, Reporting UI, PDF Exports, Dashboards, Data Validation

Tools: Git, GitHub, Docker, Postman, Vercel, Render, Code Reviews, Documentation

EXPERIENCE

Kosick Communications Ltd.

Jun 2026 – Present

Full Stack Software Engineer

Remote

- Delivered **Next.js/TypeScript** dashboards surfacing KPIs across **4** data categories.
- Reduced manual reporting by integrating revenue, lead, goal, and operations workflows.
- Implemented role-based access for **2** user types with **Supabase** auth and profiles.
- Built reusable reporting views, progress modules, and PDF export workflows for business users.

SFU Blueprint

Jan 2026 – Present

Junior Developer

Burnaby, BC

- Shipped **4** production page updates by translating Figma specs into responsive UI.
- Improved site performance by **30%** through optimized **React/Vite** components.
- Reduced duplicated frontend code by refactoring shared styles and reusable UI patterns.
- Raised release quality through **Git** pull requests, code reviews, and issue tracking.

FOUR Clothing

Aug 2025 – Present

Co-Founder, Full-Stack Developer

Jakarta, Indonesia

- Improved storefront load speed by **25%** using **Next.js** and TypeScript.
- Increased funnel visibility by tracking product views, traffic, and customer behavior.
- Supported marketing decisions with analytics for sales activity and campaign performance.
- Reduced update effort by building reusable landing, product, and campaign components.

PROJECTS

BargAI - Real-Time AI Meeting Assistant

Python, JavaScript, Gemini API, Selenium

- Delivered meeting insights in under **3s** using **Selenium** and Python processing.
- Reduced LLM workflow latency by structuring live context before third-party API requests.
- Built AI-generated summaries and follow-ups into a JavaScript interface.

PlannerBuddy - Collaborative Work Management Platform

React, Convex, Node.js

- Reduced data inconsistencies by **20%** through backend validation and shared state.
- Built task creation, filtering, status tracking, and reporting with database-backed state.
- Improved maintainability with reusable workflow components and modular task views.

CareConnect - Real-Time Analytics Platform

React, Firebase

- Improved real-time data access by building persistent **React/Firebase** tracking flows.
- Increased insight visibility with dashboards for engagement and behavior patterns.
- Improved data consistency by connecting frontend state with Firebase-backed storage.

Genre and Popularity Analysis of Songs

Python, Pandas, NumPy, Matplotlib

- Analyzed **20+ years** of music data to identify genre, tempo, and popularity trends.
- Built data cleaning and transformation workflows using **Pandas** and **NumPy**.
- Created visual reports showing feature patterns across song popularity and genre groups.

EDUCATION

Simon Fraser University

Sep 2022 – Dec 2025

Bachelor of Science in Computer Science

Burnaby, BC

- **Relevant Coursework:** Software Engineering, Databases, Web Development, Data Structures, Algorithms, Networks
